Areas of expertise

- » Paediatrics
- » Health and safety
- » Safer handling
- » Life support (adult and child)

Professional experience

Katie qualified as a children's nurse in 2006 and worked on the children's ward before moving to children's observation and assessment unit and children's community team. While working within the community team, Katie cared for children with tracheostomies, gastrostomies and a range of other health issues including seizure management and allergies. During this time, Katie began to deliver training at home and school to parents, to give them confidence in caring for their child.

Following this, Katie then moved to the accident and emergency department as a Junior Sister. Since 2018, Katie has been a practice educator for the emergency department in this role, involving her delivering training to staff on a variety of courses including life support and running simulation sessions with medical colleagues to allow staff to build their confidence when dealing with a variety of different conditions in a safe and controlled environment.

Katie's role at PSP involves the preparation and delivery of training courses to families, carers, fellow healthcare professionals and businesses.
